Most of us enjoy the challenge of a good puzzle, but young children seem to be especially fond of them. Since there are only four parts, this makes a wonderful first puzzle for toddlers. And because the parts are large, they don't present a choking hazard. Our thanks to The Puzzle People of Colfax, California for providing us with this cute design.

To start, you'll need a piece of 1½ in. thick stock that measures 7¼ in. wide by 8 in. long. Look for stock that's free from large knots or other defects.

Once the stock is cut, you can transfer the full-size pattern from the drawing to the stock using tracing or carbon paper. However, if you have access to a photocopier, the job can be even easier. Make a copy of the plan, then use rubber cement or a spray adhesive to bond the copy to the stock.

Use a scroll saw to cut the various parts as shown. If you use a fine-toothed scroll saw blade, the resulting cuts probably won't require any sanding. Bore a ⅛ in. diameter by ⅛ in. deep hole for each eye.

Assemble the puzzle and thoroughly sand both sides. If you apply a finish, be sure to choose one that's non-toxic. For a toy like this, we generally prefer to leave it unfinished.
